Subject Index to Volume 15

Acanthamoeba

- contact lenses, amoebae binding 151
- chlorhexidine, polyhexamethylene biguanide, amoebic keratitis 225

Aclacinomycin A

- aclarubicin, cell culture, retinal pigment epithelium, antiproliferative effect, proliferative vitreoretinopathy, pig 1112

Aggregation

- gamma crystallin, pantethine, phase separation, inhibition, lens, cataract, bovine (cattle) 1182

Aging

- summation, binocular, monocular, contrast sensitivity 315
- alpha-mannosidase, glycosidases, lysosomes, retinal pigment epithelium (RPE), human 433
- crystallins, protein, human lens 511

Aldehyde dehydrogenase

- cornea, oxidative damage, protective role, bovine 685

Aldose reductase inhibitor

- naphthalene, cataract, rat 423
- corneal sensitivity, diabetes mellitus, corneal hypesthesia, rat 1005

Allele-specific polymerase chain reaction (PCR)

- rod-cone dysplasia, dog, cGMP phosphodiesterase, progressive retinal atrophy, retinal degeneration 583

Allergic conjunctivitis naphthalene

- histamine, interleukin-4, conjunctival cells, human 209

Alpha₂ adrenergic receptors

- intraocular pressure, efaroxan, imidazoline₁, rauwolscine, rilmenidine, rabbit 943

Alpha-crystallins

- structure, protein interactions, transparency, lens, cattle (bovine) 215
- plasma membrane, cataract, electron microscopy, immunolocalization, human 577

Alpha-smooth muscle actin

- transforming growth factor- β (TGF- β), retinal pigment epithelial cells, myofibroblast, proliferative vitreoretinopathy, bovine (cattle) 1144

2-Amino-4-phosphorobutylate (APB)

- electroretinogram (ERG), experimental myopia, kainic acid, oscillatory potentials, chick 79

Anaerobic culture

- culture contamination, vitreous fluid, endophthalmitis, *Propionibacterium acnes*, human 697

Androgen receptor

- estrogen receptor, lacrimal gland, diabetes, hypophysectomy, rat, guinea pig, Syrian hamster, rabbit 279

Animal model

- macrophage, glaucoma filtrative surgery, sclerostomy, wound healing, immunohistochemistry, rat 559
- retinopathy of prematurity, oxygen (eve), hyperoxia, hypoxia, retina, rat 932

Anterior segment

- interferon-gamma, intercellular adhesion molecule 1, rat 203

Anti-basement membrane zone antibody

- cicatrical pemphigoid, pseudo- or drug-related ocular cicatricial pemphigoid, autoantigen, immunoblot technique MHC class II genes, human 521

Antimetabolites

- corneal wound healing, human epidermal growth factor (hEGF), 5-fluorouracil, mitomycin C, rabbit 247

Antioxidant enzymes

- retina, catalase, glutathione peroxidase, superoxide dismutase, human 273

Antisense oligonucleotide

- photoreceptor processing, lysosomal digestion, retinal pigment epithelium (RPE), rat 119

Antitransferrin receptor immunotoxin

- pharmacokinetics, proliferative vitreoretinopathy, rabbit 1039

Apoptosis

- hypericin, retinal pigment epithelium (RPE), proliferative vitreoretinopathy (PVR), tumor necrosis factor, alpha (TNF- α), protein kinase C, cattle (bovine) 255
- Fas antigen, uveitis, aqueous humor, memory cell, human 299
- light damage, photoreceptor, intermittent light, rhodopsin 914
- clonal cultures, epithelial-mesenchymal interactions, growth factors, stem cells, cell culture, rabbit, mouse 973

Aqueous humor

- metalloproteinase, uveitis, TIMP, zymography, human, rabbit 1060

Aqueous humor outflow route

- piscular vasculature, resin cast, cynomolgus monkey, owl monkey 321

Arrestin

- human retinal pigment epithelium (HRPE), cultured cells, immunolocalization, S-antigen 9

Arteriovenous anastomoses

- episcleral venous pressure, epinephrine, nitroprusside, rabbit eye 87

Axial eye length

- laser Doppler interferometry, retinal thickness, eye growth, chicken 691

Basic fibroblast growth factor

- choroidal neovascularization, *in situ* hybridization, retinal pigment epithelial (RPE) cells, vascular endothelial cells, krypton laser photocoagulation, rat 1008

Best vitelliform dystrophy

- focal electroretinogram, Fourier analysis, photoreceptor, postreceptor retina, human 638

Beta-carotene

- retinal light damage, ultraviolet-A light, photoreceptor cell, retinal pigment epithelium (RPE), rat 219

Big-h3

- immunocytochemistry, *in situ* hybridization, extracellular matrix, human 965

Blepharospasm

- myotoxin, eyelid, facial muscles, hemifacial spasm, rabbit 883

Butylated hydroxytoluene

- 4-hydroxynonenal, cataract, lipid peroxidation, glutathione S-transferase, rat 749

Calcitonin gene-related peptide

- rabbit iris dilator, cyclic AMP, meiosis, substance P 105

Calcium-activated K⁺ current

- retinal pigment epithelial cells (RPE), patch-clamp, rabbit 237

Calcium-sensitive potassium conductance

- lens, electrolyte transport, Ussing chamber, acetylcholine, nifedipine, rabbit 1198

Cardiac cycle

- retinal vessel diameter, image analysis, electrocardiograph, retinal blood flow, human 625

Catalase

- oxidative stress, ocular lens, glutathione peroxidase, superoxide dismutase, rhesus monkey 845

Cataract

- Lens Opacities Classification System II, lens opacities, Lensmeter 701, human 293
- naphthalene, aldose reductase inhibitor, rat 423
- 4-hydroxynonenal, butylated hydroxytoluene, lipid peroxidation, glutathione S-transferase, rat 749

- Cataract photography**
longitudinal study, ocular image analysis, cortical cataracts, statistical analysis, human 53
- Cataractogenesis**
photorefractive keratectomy, cataract, UV radiation, rabbit 355
- cDNA cloning**
protein, tears, lacrimal gland, human 377
- Cell attachment**
corneal epithelial cells, entactin, extracellular matrix, laminin, rabbit 733
- Cell culture**
aclerubicin, retinal pigment epithelium, aclinomycin A, antiproliferative effect, proliferative vitreoretinopathy, pig 1112
- Cell shedding rate**
corneal epithelium, cell death, tissue kinetics, apoptosis, rabbit 1054
- Chlorhexidine**
Acanthamoeba, polyhexamethylene biguanide, amoebic keratitis 225
- 5-chloromethylfluorescein diacetate**
confocal microscopy, cornea, keratocytes, three dimensional reconstruction, pig 165
- Chondroitin sulfate**
hyaluronan, tears, cornea, wound healing, rabbit 131
- Choroid**
endothelin, endothelin receptors, retina, immunocytochemistry, human, rat 111
- Choroidal circulation**
choroid, laser speckle phenomenon, nicardipine, rabbit eye 543
- Choroidal neovascularization**
basic fibroblast growth factor, *in situ* hybridization, retinal pigment epithelial cells, vascular endothelial cells, krypton laser photocoagulation, rat 1008
- Cicatricial pemphigoid**
anti-basement membrane zone antibody, pseudo- or drug-related ocular cicatricial pemphigoid, autoantigen, immunoblot technique, MHC class II genes, human 521
- Ciliary arteries**
dipyridamole, nitric oxide, prostacyclin, endothelin-1, vasodilation, porcine (pig) 387
- Ciliary body vasculature**
endothelin, iris vasculature, vascular casting, rabbit 633
- Ciliary epithelium**
patch clamping, cation-nonselective channels, phototransduction channel, nonpigmented ciliary epithelial cells, rabbit 193
- Ciliary ganglion**
eye growth, refraction, vitreous cavity shape, chick 453
- Ciliary non-pigmented epithelium**
thrombomodulin, rabbit eye, chorioretinal vessels, trabecular plexus 938
- Ciliary smooth muscle**
prostaglandins, matrix metalloproteinase (MMP), collagenase, glaucoma stromelysin-1, cell culture, human 869
- Circadian rhythm**
intraocular pressure, glaucoma, TonoPen, rat 185
- Cloning**
human retinal pigment epithelium, taurine transporter, oocyte expression, reverse transcription-polymerase chain reaction (RT-PCR) 345
- Collagen II**
hyaluronic acid, human vitreous, ultrastructure, immunohistochemistry 37
- Collagen corneal shield**
liposomes, carboxyfluorescein, phosphatidylethanolamine-rhodamine B, release kinetics 815
- Condroitin sulfate**
hyaluronan, tears, cornea, wound healing, rabbit 131
- Confocal microscopy**
5-chloromethylfluorescein diacetate, cornea, keratocytes, three dimensional reconstruction, pig 165
- Conjunctiva**
Na⁺-glucose cotransport, short-circuit current, pigmented rabbit 447
- Conjunctival**
epithelium, corneal epithelium, nuclear matrix keratin, lamins, bovine (cattle) 899
- Connexins**
lens, fiber cells, gap junctions, gene, sheep 307
- Contact lenses**
Acanthamoeba, amoebae binding 151
diurnal cycle, lysozyme, tears, complement 1092
- Cornea**
5-chloromethylfluorescein diacetate, confocal microscopy, keratocytes, three dimensional reconstruction, pig 165
instrument, transparency, transmittance, ultraviolet light (UV), visible light, rabbit 411
herpes virus latency, propanolol, rabbit, reactivation 680
aldehyde dehydrogenase, oxidative damage, protective role, bovine 685
- Corneal epithelial cell(s)**
cryopreservation, Na⁺, K⁺ ATPase, endothelial cell fluid pump, cattle (bovine) 263
human immunodeficiency virus-1 (HIV-1), human herpes virus-6 (HHV-6), keratinocytes, lacrimal gland, human 597
dry eye syndrome (keratoconjunctivitis sicca), dynamic contact, hard contact lens, rose bengal, pig 647
cell attachment, entactin, extracellular matrix, laminin, rabbit 733
- Corneal epithelium**
pili, receptors, intermediate filaments, cytokeratins 782
proto-oncogenes, wound healing, *in situ* hybridization, immunohistochemistry, rat 824
conjunctival epithelium, nuclear matrix, keratin, lamins, bovine (cattle) 899
cell shedding rate, cell death, tissue kinetics, apoptosis, rabbit 1054
- Corneal permeability**
12(R)-hydroxyeicosatetraenoic acid (12[R]-HETE), arachidonic acid, corneal epithelium, corneal endothelium, rabbit 852
- Corneal rejection**
eicosanoid, 12-(S)-hydroxyeicosatetraenoic acid [12-(S) HETE], penetrating keratoplasty, prostaglandin-E₂ (PGE₂), rabbit 1208
- Corneal sensitivity**
aldose reductase inhibitor, diabetes mellitus, corneal hypesthesia, rat 1005
- Corneal transplantation**
transplantation antigens, corneal endothelial cells, immunochemistry, transmission electron microscopy, ultraviolet light, human 669
- Corneal wound healing**
antimetabolites, human epidermal growth factor (hEGF), 5-fluorouracil, mitomycin C, rabbit 247
- Cryopreservation**
corneal endothelial cells, Na⁺, K⁺ ATPase, endothelial cell fluid pump, cattle (bovine) 263
- Crystallins**
structure, protein interactions, transparency, lens, cattle (bovine) 215
alpha crystallins, aging, protein, human lens 511
alpha crystallins, plasma membrane, cataract, electron microscopy, immunolocalization, human 577
- Culture contamination**
anaerobic culture, vitreous fluid, endophthalmitis, *Propionibacterium acnes*, human 697
- Cyclic 1-[(s)-3-hydroxy-2-(phosphonome deoxy) propyl] cytosine (HPMPC)**
intravitreal, cidofovir, distribution, rabbit 569
- Cyclic adenosine (3',5')-monophosphate (cAMP)**
iris sphincter, phorbol ester, protein kinase C (PKC), isoforms, contraction, subcellular distribution, rabbit, cat, dog, cattle (bovine) 329
epinephrine, iris-ciliary body, *in vivo*, laser photocoagulation, rabbit 1025
- Cyclic nucleotide phosphodiesterase**
lacrimal gland, Harderian gland, zygomatic gland, rabbit 1191
- Cyclosporine**
retinal rod outer segments, phagocytosis, retinal pigment epithelium, dystrophic rat 487

- dexamethasone, intravitreal drug delivery, uveitis, proliferative vitreoretinopathy, rabbit 549
- Cytokeratin**
proliferative cell nuclear antigen, superior limbic keratoconjunctivitis, immunohistochemistry, keratinization, human 1033
- Defocus**
aliasing, peripheral visual acuity 351
- Descemet's membrane**
Fuchs' endothelial dystrophy, wide-spaced collagen, iridocorneal-endothelial syndrome, type VIII collagen, human 45
- Dexamethasone**
cyclosporine, intravitreal drug delivery, uveitis, proliferative vitreoretinopathy, rabbit 549
- Diabetes mellitus**
aldose reductase inhibitor, corneal sensitivity, corneal hyperesthesia, rat 1005
- Diabetic rats**
gamma-aminobutyric acid (GABA), retinal neurotransmitters, immunocytochemistry, oscillatory potentials 63
gamma-aminobutyric acid (GABA), Müller cells, electron microscopic immunocytochemistry, retina 958
- Diabetic retinopathy**
kallikrein, human kallikrein-binding protein, vitreous, *in situ* hybridization 1117
- Dipyridamole**
ciliary arteries, nitric oxide, prostacyclin, endothelin-1, vasodilation, porcine (pig) 387
- Diurnal cycle**
contact lens, lysozyme, tears, complement 1092
- cDNA cloning**
protein, tears, lacrimal gland, human 377
- Dog**
allele-specific polymerase chain reaction (PCR), cGMP phosphodiesterase, progressive retinal atrophy, retinal degeneration, rod-cone dysplasia 583
- Dry eye**
tears, rose bengal staining, human 653
- Ecosanoid**
corneal rejection, 12-(S)-hydroxyeicosa tetraenoic acid [12-(S) HETE], penetrating keratoplasty, prostaglandin-E₂ (PGE₂), rabbit 1208
- Electron microscopy**
human nuclear cataracts, age-related cataracts, lens opacity, lens ultrastructure 533
glutaraldehyde fixation, high pressure freezing, retinal light change, photoreceptor degeneration, rod outer segments, ultrastructure, rat 807
- Electroretinogram (ERG)**
2-amino-4-phosphorobutylate (APB), experimental myopia, kainic acid, oscillatory potentials, chick 79
insulin, retina, bovine 1132
- Endothelin**
endothelin receptors, retina, choroid, immunocytochemistry, human, rat 111
iris vasculature, ciliary body vasculature, vascular casting, rabbit 633
lacrimal gland, Harderian gland, tear fluid, immunohistochemistry, polymerase chain reaction (PCR), rabbit 768
- Endothelin receptor(s)**
rabbit iris sphincter, BQ-123, IRL 1620, sarafotoxins 73
endothelin, retina, choroid, immunocytochemistry, human, rat 111
- Entactin**
cell attachment, corneal epithelial cells, extracellular matrix, laminin, rabbit 733
- Epinephrine**
cAMP, iris-ciliary body, *in vivo*, laser photocoagulation, rabbit 1025
- Episcleral vasculature**
aqueous humor outflow route, resin cast, cynomolgus monkey, owl monkey 321
- Episcleral venous pressure**
arteriovenous anastomoses, epinephrine, nitroprusside, rabbit eye 87
- Estrogen receptor**
androgen receptor, lacrimal gland, diabetes, hypophysectomy, rat, guinea pig, Syrian hamster, rabbit 279
- Ethacrynic acid**
microtubules, calcium, porcine (pig) 985
- Excimer laser**
photorefractive keratectomy, cataract, cataractogenesis, UV radiation, rabbit 355
- Excitatory amino acids**
glutamate, retinal ischemia, immunocytochemistry, Müller cell, rat 589
- Exfoliation syndrome**
proteoglycans, cupromeronic blue, electron microscopy, glaucoma, human 1101
- Experimental autoimmune uveoretinitis**
fluorescein angiography, indocyanine green angiography, choroid, rats 1149
- Experimental myopia**
2-amino-4-phosphorobutylate (APB), electroretinogram (ERG), kainic acid, oscillatory potentials, chick 79
- Extracellular matrix (ECM)**
phagocytosis, retinal pigment epithelium (RPE), Bruch's membrane, differentiation, human 17
retinal pigment epithelial (RPE) cells, growth factors, proliferation, contraction, cell culture, human 739
retinal pigment epithelium (RPE), cell culture, bovine (cattle), porcine (pig), human 991
- Eye**
serine/threonine kinase receptor, transforming growth factor- β (TGF- β), immunohistochemistry, TGF- β receptors, rat 335
- Eye centering reflex**
human eye movements, ocular motor hierarchy 890
- Eye growth**
ciliary ganglion, refraction, vitreous cavity shape, chick 453
- Fas antigen**
apoptosis, uveitis, aqueous humor, memory cell, human 299
- Fiber cells**
lens, connexins, gap junctions, gene, sheep 307
- Flow cytometry**
photoreceptors, phagocytosis, D407 retinal pigment epithelial (RPE) cell line, bovine (cattle) 998
- Fluorescein angiography**
experimental autoimmune uveoretinitis, indocyanine green angiography, choroid, rats 1149
- Focal electroretinogram**
Best vitelliform dystrophy, Fourier analysis, photoreceptor, postreceptoral retina, human 638
- Fuchs' endothelial dystrophy**
Descemet's membrane, wide-spaced collagen, iridocorneal-endothelial syndrome, type VIII collagen, human 45
 β ig-h3, immunocytochemistry, *in situ* hybridization, extracellular matrix, human 965
- Galactose cataracts**
migration inhibitory factor (MIF) mRNA, reverse transcription polymerase chain reaction (RT-PCR), rat lens fiber cell cDNA library, rat lens epithelial cell cDNA library 125
- Gamma-aminobutyric acid (GABA)**
diabetic rats, retinal neurotransmitters, immunocytochemistry, oscillatory potentials 63
diabetic rats, Müller cells, electron microscopic immunocytochemistry, retina 958
- Gamma crystallin**
aggregation, pantethine, phase separation, inhibition, lens, cataract, bovine (cattle) 1182

- Gene transfer**
photoreceptor, retrovirus, opsin promoter, mouse retina 833
- Glaucoma**
circadian rhythm, intraocular pressure, rat, TonoPen 185
- Glaucoma filtrative surgery**
animal model (rat), macrophage, sclerostomy, wound healing, immunohistochemistry 559
- Glutamine**
rat retina, immunocytochemistry, Müller cells 662
- Glutaraldehyde fixation**
electron microscopy, high pressure freezing, retinal light damage, photoreceptor degeneration, rod outer segments, ultrastructure, rat 807
- Glutathione**
high performance liquid chromatography (HPLC), lens, thiazolidine, rat 501
lens, organ culture, 2-mercaptoethanol, rats 719
- Glycosidases**
aging, alpha-mannosidase, lysosomes, retinal pigment epithelium (RPE), human 433
- Growth factors**
Tenon's capsule fibroblasts, serum-free media, ocular wound healing, human 27
retinal pigment epithelial (RPE) cells, extracellular matrix (ECM), proliferation, contraction, human, cell culture 739
retinal photocoagulation, basic fibroblast growth factor, insulin-like growth factor, transforming growth factor beta-2, insulin-like growth factor (IGF)-binding proteins, epidermal growth factor, pig 923
- Growth retardation**
nutrition, oxygen, induced retinopathy, retinopathy of prematurity, retinal neovascularization 403
- Gyrate atrophy**
heterogeneity, mutations, Japanese, ornithine aminotransferase 792
- ¹H NMR spectroscopy**
lens, glutathione, inositol, metabolites, rabbit 1175
- Hard contact lens**
corneal epithelial cell, corneal endothelial cell, dry eye syndrome (keratoconjunctivitis sicca), dynamic contact, rose bengal, pig 647
- Harderian gland**
endothelin, lacrimal gland, tear fluid, immunohistochemistry, polymerase chain reaction (PCR), rabbit 768
cyclic nucleotide phosphodiesterase, lacrimal gland, zygomatic gland, rabbit 1191
- Herpes virus latency**
cornea, propanolol, rabbit, reactivation 680
- Heterogeneity**
gyrate atrophy, mutations, Japanese, ornithine aminotransferase 792
- High performance liquid chromatography (HPLC)**
glutathione, lens, thiazolidine, rat 501
- High pressure freezing**
electron microscopy, glutaraldehyde fixation, retinal light damage, photoreceptor degeneration, rod outer segments, ultrastructure, rat 807
- Histamine**
allergic conjunctivitis, interleukin-4, conjunctival cells, human 209
- Human corneal epithelium**
pili, receptors, intermediate filaments, cytokeratins 782
- Human epidermal growth factor (hEGF)**
antimetabolites, corneal wound healing, 5-fluorouracil, mitomycin C, rabbit 247
- Human eye movements**
eye centering reflex, ocular motor hierarchy 890
- Human herpesvirus-6 (HHV-6) corneal epithelial cells**
human immunodeficiency virus-1 (HIV-1), keratinocytes, lacrimal gland, human 597
- Human immunodeficiency virus-1 (HIV-1)**
human herpes virus-6 (HHV-6), corneal epithelial cells, keratinocytes, lacrimal gland 597
- Human lacrimal gland**
cDNA cloning, protein, tears, human 377
human lacrimal gland, TGF- β 1, TGF- β 2, glandular epithelium 615
- Human lens**
crystallins, aging, protein 511
- Human nuclear cataracts**
electron microscopy, age-related cataracts, lens opacity, lens ultrastructure 533
- Human retina**
endothelin, endothelin receptors, choroid, immunocytochemistry, human, rat 111
antioxidant enzymes, catalase, glutathione peroxidase, superoxide dismutase, human 273
neuronal differentiation, SV-40T antigen, c-fos 477
- Human retinal pigment epithelium (HRPE)**
arrestin, cultured cells, immunolocalization, S-antigen 9
taurine transporter, cyclic adenosine 3',5' monophosphate (cAMP), cholera toxin, affinity increase 229
cloning, taurine transporter, oocyte expression, reverse transcription-polymerase chain reaction (RT-PCR) 345
- Human tears**
total TGF- β 2, active TGF- β 2, ELISA 341
- Human vitreous**
hyaluronic acid, collagen II, ultrastructure, immunohistochemistry 37
- Hyaluronan**
chondroitin sulfate, tears, cornea, wound healing, rabbit 131
- Hyaluronic acid**
collagen II, human vitreous, ultrastructure, immunohistochemistry 37
- Hyaluronidase**
vitreous liquifaction, hyaluronic acid, vitreoretinal pathology, human 1156
- Hydrophilic contact lens polymers**
lysozyme, protein, deposits, dimerization 461
- 12(R)-Hydroxyeicosatetraenoic acid (12(R)-HETE)**
corneal permeability, arachidonic acid, corneal epithelium, corneal endothelium, rabbit 852
- 4-Hydroxynonenal**
butylated hydroxytoluene, cataract, lipid peroxidation, glutathione S-transferase, rat 749
- Hypericin**
retinal pigment epithelium (RPE), apoptosis, proliferative vitreoretinopathy (PVR), tumor necrosis factor alpha (TNF- α), protein kinase C, cattle (bovine) 255
- Immunocytochemistry**
proline, retina, antibody, horizontal cell, rat 951
- In vitro sugar cataract**
oxidative stress, D-xylose, osmotic stress, antioxidants, lens, rat 1
- Indocyanine green angiography**
experimental autoimmune uveoretinitis, fluorescein angiography, choroid, rats 1149
- Injury-related proteins**
keratoconus, wound healing, corneal disease, human 1124
- Insulin**
electroretinogram, retina, bovine 1132
- Intercellular adhesion molecule 1**
interferon-gamma, anterior segment, rat 203
- Interferon-gamma**
intercellular adhesion molecule 1, anterior segment, rat 203
murine retinochoroiditis, *Toxoplasma gondii*, histology 701
- Interleukin-4**
allergic conjunctivitis, histamine, conjunctival cells, human 209
- Interleukin-15**
interleukin-15 receptor α chain, retinal pigment epithelial cells, interferon- γ , tumor necrosis factor- α cell culture, human 876
- Interleukin-15 receptor α chain**
interleukin-15, retinal pigment epithelial cells, interferon- γ , tumor necrosis factor- α , cell culture, human 876

Intraocular pressure

- circadian rhythm, glaucoma, TonoPen, rat 185
- alpha₂ adrenergic receptors, efaroxan, imidazoline₁, rauwolfscine, rilmenidine, rabbit 943

Intravitreal

- cyclic 1-[(s)-3-hydroxy-2-(phosphonomethoxy)propyl] cytosine (HPMPC), distribution, cidofovir, rabbit 569

Intravitreal drug delivery

- dexamethasone, cyclosporine, uveitis, proliferative vitreoretinopathy, rabbit 549

Iris-ciliary body

- cAMP, epinephrine, *in vivo*, laser photocoagulation, rabbit 1025

Iris sphincter

- cyclic-AMP, phorbol ester, protein kinase C (PKC) isoforms, contraction, subcellular distribution, rabbit, cat, dog, cattle (bovine) 329

Iris vasculature

- endothelin, ciliary body vasculature, vascular casting, rabbit 633

K⁺-conductance

- pericytes, vasoactive substances, electrophysiology, cell culture, Royal College of Surgeons (RCS) rat 1045

Kainic acid

- 2-amino-4-phosphorbutylate (APB), electroretinogram (ERG), experimental myopia, oscillatory potentials, chick 79

Kallikrein

- diabetic retinopathy, human kallikrein-binding protein, vitreous, *in situ* hybridization 1117

Keratoconus

- wound healing, injury-related proteins, corneal disease, human 1124

Lacrimal gland

- protein kinases, calmodulin, cAMP, phosphorylation, rat 157
- androgen receptor, estrogen receptor, diabetes, hypophysectomy, rat, guinea pig, Syrian hamster, rabbit 279
- cDNA cloning, protein, tears, human 377
- human lacrimal gland, TGF- β 1, TGF- β 2, glandular epithelium 615
- endothelin, Harderian gland, tear fluid, immunohistochemistry, polymerase chain reaction (PCR), rabbit 768
- cyclic nucleotide phosphodiesterase, Harderian gland, zygomatic gland, rabbit 1191

Laser speckle phenomenon

- nifedipine, choroidal circulation, choroid, rabbit eye 543

Laser Doppler interferometry

- axial eye length, retinal thickness, eye growth, chicken 691

Lens

- fiber cells, connexins, gap junctions, gene, sheep 307
- peptide hydrolysis, aging, leucine aminopeptidase, aminopeptidase III, prolyl oligopeptidase, acylpeptide hydrolase, water-insoluble protein, cattle (bovine), human 363
- glutathione, high performance liquid chromatography (HPLC), thiazolidine, rat 501
- crystallins, aging, protein, human 511
- glutathione, organ culture, 2-mercaptoethanol, rats 719
- reduced glutathione (GSH), oxidized glutathione (GSSG), lens, high performance liquid chromatography (HPLC) 726
- peptidase, leucine aminopeptidase, aminopeptidase III, bovine, human 774
- ¹H NMR spectroscopy, glutathione, inositol, metabolites, rabbit 1175
- calcium-sensitive potassium conductance, electrolyte transport, Ussing chamber, acetylcholine, nifedipine, rabbit 1198

Lens membrane

- lipid peroxidation, cataract, fluorescence, hydrogen peroxidation, parinaric acid, cattle (bovine) 395

Lens Opacities Classification System II

- cataract, lens opacities, Lensmeter 701, human 293

Light damage

- apoptosis, photoreceptor, intermittent light, rhodopsin 914

Linoleic acid

- retinal pigment epithelial (RPE) cells, linoleic acid hydroperoxide, cell proliferation, electron microscopy, cell culture, cattle (bovine) 467

Linoleic acid hydroperoxide

- retinal pigment epithelial (RPE) cells, linoleic acid, cell proliferation, electron microscopy, cell culture, cattle (bovine) 467

Lipid peroxidation

- lens membrane, cataract, fluorescence, hydrogen peroxidation, parinaric acid, cattle (bovine) 395

Liposomes

- collagen corneal shield, carboxyfluorescein, phosphatidylethanolamine-rhodamine B, release kinetics 815

Longitudinal study

- cataract photography, ocular image analysis, cortical cataracts, statistical analysis, human 53

Lysozyme

- hydrophilic contact lens polymers, protein, deposits, dimerization 461

Macrophage

- animal model (rat), glaucoma filtrative surgery, sclerostomy, wound healing, immunohistochemistry 559

Matrix metalloproteinase (MMP)

- type II collagen, type IX collagen, type V/XI collagen, vitreous, porcine (pig) 439
- ciliary smooth muscle, prostaglandins, collagenase, glaucoma
- stromelysin-1, cell culture, human 869

Meibomian gland

- Meibomian oil, tarsal plate, eyelid, phospholipids, ³¹P nuclear magnetic resonance (NMR), rabbit 371

Melanin pigment

- retinal pigment epithelial (RPE) cells, ocular melanocytes, tyrosinase, extracellular matrix (ECM), human 1079

Metalloproteinase

- aqueous humor, uveitis, TIMP, zymography, human, rabbit 1060

Microtubules

- ethacrynic acid, calcium, porcine (pig) 985

Migration inhibitory factor (MIF) mRNA

- galactose cataracts, reverse transcription polymerase chain reaction (RT-PCR), rat lens fiber cell cDNA library, rat lens epithelial cell cDNA library 125

Morphometry

- optic disc, visual field, follow-up, glaucoma, ocular hypertension, human 145

Müller cell(s)

- elasmobranch, retinal pigment epithelium, retinoid binding protein, vitamin A 905
- diabetic rats, gamma-aminobutyric acid (GABA), electron microscopic immunocytochemistry, retina 958

Murine retinochoroiditis

- interferon gamma, *Toxoplasma gondii*, histology 701

Mutations

- gyrate atrophy, heterogeneity, Japanese, ornithine aminotransferase 792

Myotoxin

- blepharospasm, eyelid, facial muscles, hemifacial spasm, rabbit 883

Na⁺-glucose cotransport

- short-circuit current, conjunctiva, pigmented rabbit 447

Na⁺,K⁺ ATPase

- corneal endothelial cells, cryopreservation, endothelial cell fluid pump, cattle (bovine) 263

Naphthalene

- cataract, aldose reductase inhibitor, rat 423

Natriuretic peptides

- trabecular meshwork, natriuretic peptide receptor-B (NPR), natriuretic peptide receptor-C (NPR-C), cyclic guanosine monophosphate (cGMP), human 137

Neuronal differentiation

human retina, SV-40T antigen, c-fos, 477

Neuropeptides

retinal pigment epithelial (RPE) cell, β -endorphin, calcitonin gene-related peptide, substance P, cell culture, chick embryo 708

Neurotransmitters

retina, receptors, transporters 797

Nicardipine

laser aepckle phenomenon, choroidal circulation, choroid, rabbit eye 543

Nuclear matrix

conjunctival epithelium, corneal epithelium, keratin, lamins, bovine (cattle) 899

Octreotide acetate

retinal pigment epithelial cell, analog, cellular proliferation, proliferative vitreoretinopathy, somatostatin, rabbit 909

Ocular image analysis

cataract photography, longitudinal study, cortical cataracts, statistical analysis, human 53

Ocular lens

catalase, oxidative stress, glutathione peroxidase, superoxide dismutase, rhesus monkey 845

Ocular melanocytes

retinal pigment epithelial (RPE) cells, melanin pigment, tyrosinase, extracellular matrix (ECM), human 1079

Optic disc

morphometry, visual field, follow-up, glaucoma, ocular hypertension, human 145

Organ culture

glutathione, lens, 2-mercaptoethanol, rats 719

Oxidative stress

in vitro sugar cataract, D-xylose, osmotic stress, antioxidants, lens, rat 1
catalase, ocular lens, glutathione peroxidase, superoxide dismutase, rhesus monkey 845

Oxidized glutathione (GSSG),

reduced glutathione (GSH), lens, high performance liquid chromatography (HPLC) 726

Oxygen (eve)

retinopathy of prematurity, animal model, hyperoxia, hypoxia, retina, rat 932

Pantethine

gamma crystallin, aggregation, phase separation, inhibition, lens, cataract, bovine (cattle) 1182

Patch clamping

ciliary epithelium, cation-nonselective channels, phototransduction channel, nonpigmented ciliary epithelial cells, rabbit 193

Peptidase

lens, leucine aminopeptidase, aminopeptidase III, bovine, human 774

Peptide hydrolysis

lens, aging, leucine aminopeptidase, aminopeptidase III, prolyloligopeptidase, acylpeptidohydrolase, water-insoluble protein, cattle (bovine), human 363

Pericytes

vasoactive substances, K^+ -conductance, electrophysiology, cell culture, Royal College of Surgeons (RCS) rat 1045

Peripheral visual acuity

defocus, aliasing 351

Permeability characteristics

primary cultured rabbit conjunctival epithelial cells, low molecular weight drugs, lipophilicity 1170

Phagocytosis

extracellular matrix, retinal pigment epithelium (RPE), Bruch's membrane, differentiation, human 17

cytokine, retinal rod outer segments, retinal pigment epithelium, dystrophic rat 487

photoreceptors, flow cytometry, D407 retinal pigment epithelial (RPE) cell line, bovine (cattle) 998

Pharmacokinetics

antitransferrin receptor immunotoxin, proliferative vitreoretinopathy, rabbit 1039

Phorbol ester

cyclic adenosine 3',5'-monophosphate (cAMP), iris sphincter, protein kinase C (PKC), contraction, subcellular distribution, rabbit, cat, dog, cattle (bovine) 329

Phospholipids

Meibomian gland, Meibomian oil, tarsal plate, eyelid, ^{31}P nuclear magnetic resonance (NMR), rabbit 371

Photoreceptor(s)

gene transfer, retrovirus, opsin promoter, mouse retina 833
flow cytometry, phagocytosis, D407 retinal pigment epithelial (RPE) cell line, bovine (cattle) 998
apoptosis, light damage, intermittent light, rhodopsin 914

Photoreceptor cell

retinal pigment epithelium, transplantation, outer segment regeneration, Royal College of Surgeons rat 1060

Photoreceptor processing

antisense oligonucleotide, lysosomal digestion, retinal pigment epithelium, (RPE), rat 119

Photorefractive keratectomy

excimer laser, cataract, cataractogenesis, UV radiation, rabbit 355

Pili

human corneal epithelium, receptors, intermediate filaments, cytokeratins 782

Plasma membrane

α -crystallins, cataract, electron microscopy, immunolocalization, human 577

Plasminogen activator

uveal melanoma, transforming growth factor-beta (TGF- β), growth factors, urokinase, human 755

Polyhexamethylene biguanide

Acanthamoeba, chlorhexidine, amoebic keratitis 225

Primary cultured rabbit conjunctival epithelial cells

permeability characteristics, low molecular weight drugs, lipophilicity 1170

Proliferative cell nuclear antigen

cytokeratin, superior limbic keratoconjunctivitis, immunohistochemistry, keratinization, human 1033

Proliferative vitreoretinopathy

pharmacokinetics, antitransferrin receptor immunotoxin, rabbit 1039

Proline

immunocytochemistry, retina, antibody, horizontal cell, rat 951

Propanolol

cornea, herpesvirus latency, reactivation, rabbit 680

Prostaglandins

ciliary smooth muscle, matrix metalloproteinase (MMP), collagenase, glaucoma, stromelysin-1, cell culture, human 869

Protein

cDNA cloning, tears, lacrimal gland, human 377

Protein kinase C (PKC)

cyclic AMP, iris sphincter, phorbol ester, isoforms contraction, different species, subcellular distribution, rabbit, cat, dog, cattle (bovine) 329

Protein kinases

lacrimal gland, calmodulin, cAMP, phosphorylation, rat 157

Proteoglycans

exfoliation syndrome, cupromeronic blue, electron microscopy, glaucoma, human 1101

Proto-oncogenes

corneal epithelium, wound healing, *in situ* hybridization, immunohistochemistry, rat 824

Pseudo- or drug-related ocular cicatricial pemphigoid

anti-basement membrane zone antibody, cicatricial pemphigoid, autoantigen, immunoblot technique, MHC class II genes, human 521

Rabbit conjunctival epithelial primary culture

transepithelial electrical resistance, permeable support, potential difference 1163

Rabbit eye

ciliary non-pigmented epithelium, thrombomodulin, chorioretinal vessels, trabecular plexis 938

Rabbit iris dilator

calcitonin gene-related peptide, cyclic AMP, meiosis, substance P 105

Rabbit iris sphincter

endothelin receptor, BQ-123, IRL 1620, sarafotoxins 73

Rat eye

serine/threonine kinase receptor, transforming growth factor- β (TGF- β), immunohistochemistry, TGF- β receptors 335

Rat retina

glutamine, immunocytochemistry, Müller cells 662

Reduced glutathione (GSH)

oxidized glutathione (GSSG), lens, high performance liquid chromatography (HPLC) 726

Retina

antioxidant enzymes, catalase, glutathione peroxidase, superoxide dismutase, human 273
neurotransmitters, receptors, transporters 797
endothelin, endothelin receptors, choroid, immunocytochemistry, human, rat 111
glutamine, immunocytochemistry, Müller cells, rat
proline, immunocytochemistry, antibody, horizontal cell, rat 951

Retinal development

retinal fatty acids, retinal phospholipids, chick embryo development 1138

Retinal fatty acids

retinal development, retinal phospholipids, chick embryo development 1138

Retinal ischemia

excitatory amino acids, glutamate, immunocytochemistry, Müller cell, rat 589

Retinal light damage

electron microscopy, glutaraldehyde fixation, high pressure freezing, photoreceptor degeneration, rod outer segments, ultrastructure, rat 807
beta-carotene, ultraviolet-A light, photoreceptor cell, retinal pigment epithelium (RPE), rat 219

Retinal neovascularization

vascular endothelial growth factor (VEGF), *in situ* hybridization, neovascularization, retinal vasculature, cat 175
growth retardation, retinal neovascularization, retinopathy of prematurity, nutrition, oxygen induced retinopathy, rat 403

Retinal neurotransmitters

diabetic rats, gamma-aminobutyric acid (GABA), immunocytochemistry, oscillatory potentials 63

Retinal phospholipids

retinal development, retinal fatty acids, chick embryo development 1138

Retinal photocoagulation

growth factors, basic fibroblast growth factor, insulin-like growth factor, transforming growth factor beta-2, insulin-like growth factor (IGF)-binding proteins, epidermal growth factor, pig 923

Retinal pigment epithelial (RPE) cell(s)

calcium-activated K⁺ current, patch clamp, rabbit 237
cell proliferation, electron microscopy, linoleic acid, linoleic acid hydroperoxide, cell culture, cattle (bovine) 467
neuropeptides, β -endorphin, calcitonin gene-related peptide, substance P, cell culture, chick embryo 708
extracellular matrix (ECM), growth factors, proliferation, contraction, cell culture, human 739
interleukin-15, interleukin-15 receptor α chain, interferon- γ , tumor necrosis factor- α cell culture, human 876
elasmobranch, Müller cell, retinal pigment epithelium, retinoid binding protein, vitamin A 905
octreotide acetate, analog, cellular proliferation, proliferative vitreoretinopathy, somatostatin, rabbit 909

ocular melanocytes, melanin pigment, tyrosinase, extracellular matrix (ECM), human 1079

alpha-smooth muscle actin, transforming growth factor- β (TGF- β), myofibroblast, proliferative vitreoretinopathy bovine (cattle) 1144

Retinal pigment epithelium (RPE)

arrestin, cultured cells, immunolocalization, S-antigen, human 9
extracellular matrix, phagocytosis, Bruch's membrane, differentiation, human 17
taurine transporter, cyclic adenosine 3',5' monophosphate (cAMP), cholera toxin, affinity increase, human 229
hypericin, apoptosis, proliferative vitreoretinopathy (PVR), tumor necrosis factor- α (TNF- α), protein kinase C, cattle (bovine) 255
cloning, taurine transporter, oocyte expression, reverse transcription-polymerase chain reaction (RT-PCR), human 345
aging, alpha-mannosidase, glycosidases, lysosomes, human 433
wound healing, cytoskeletons, intercellular junctions, tissue culture, rat 714
serous retinal detachment, subretinal fluid, choroidal ischemia, protein, rabbit 764
extracellular matrix, cell culture, bovine (cattle), porcine (pig), human 991
transplantation, photoreceptor cell, outer segment regeneration, Royal College of Surgeons (RCS) rat 1060
aclaurubicin, cell culture, aclacinomycin A, antiproliferative effect, proliferative vitreoretinopathy, pig 1112
ocular melanocytes, melanin pigment, tyrosinase, extracellular matrix (ECM), human 1079

Retinal rod outer segments

cytokine, phagocytosis, retinal pigment epithelium, dystrophic rat 487

Retinal thickness

laser Doppler interferometry, axial eye length, eye growth, chicken 691

Retinal vessel diameter

cardiac cycle, image analysis, electrocardiograph, retinal blood flow, human 625

Retinoid binding protein

elasmobranch, Müller cell, retinal pigment epithelium, vitamin A 905

Retinopathy of prematurity

vascular endothelial growth factor (VEGF), *in situ* hybridization, neovascularization, retinal vasculature, cat 175
growth retardation, retinal neovascularization, nutrition, oxygen, induced retinopathy, rat 403
animal model, oxygen (eve), hyperoxia, hypoxia, retina, rat 932

Retrovirus

gene transfer, photoreceptor, opsin promoter, mouse retina 833

Rhodopsin phosphorylation

zinc, rhodopsin, rhodopsin kinase, rod outer segment, bovine (cattle) 1019

Rod-cone dysplasia

allele-specific polymerase chain reaction (PCR), cGMP phosphodiesterase, progressive retinal atrophy, retinal degeneration, dog 583

Royal College of Surgeons (RCS) rat

electrophysiology, K⁺-conductance, pericytes, vasoactive substances, cell culture 1045

Serine/threonine kinase receptor

rat eye, transforming growth factor- β (TGF- β), immunohistochemistry, TGF- β receptors 335

Serous retinal detachment

retinal pigment epithelium (RPE), subretinal fluid, choroidal ischemia, protein, rabbit 764

Structure

a-crystallin, protein interactions, transparency, lens, cattle (bovine) 215

Subretinal fluid

retinal pigment epithelium (RPE), serous retinal detachment, choroidal ischemia, protein, rabbit 764

Summation

ageing, binocular, monocular, contrast sensitivity 351

Superior limbic keratoconjunctivitis

cytokeratin proliferative cell nuclear antigen, immunohistochemistry, keratinization, human 1033

Taurine transporter

human retinal pigment epithelium, cyclic adenosine 3',5' monophosphate (cAMP), cholera toxin, affinity increase 229
cloning, human retinal pigment epithelium, oocyte expression, reverse transcription-polymerase chain reaction (RT-PCR) 345

Tear fluid

endothelin, lacrimal gland, Harderian gland, immunohistochemistry, polymerase chain reaction (PCR), rabbit 768

Tears

chondroitin sulfate, hyaluronan, cornea, wound healing, rabbit 131
total TGF- β 2, active TGF- β 2, ELISA, human 341
transforming growth factor-beta, (TGF- β), TGF- β 1, TGF- β 2, tear proteins, human 605
dry eye, rose bengal staining, human 653

Tenon's capsule fibroblasts

growth factors, serum-free media, ocular wound healing, human 27

Thrombomodulin

rabbit eye, ciliary non-pigmented epithelium, chorioretinal vessels, trabecular plexis 938

Total TGF- β 2

human tears, active TGF- β 2, ELISA 341

Toxoplasma gondii

interferon gamma, murine retinochoroiditis, histology 701

Trabecular meshwork

natriuretic peptides, natriuretic peptide receptor-B (NPR-B), natriuretic peptide receptor-C (NPR-C), cyclic guanosine monophosphate (cGMP), human 137

Transepithelial electrical resistance

rabbit conjunctival epithelial primary culture, permeable support, potential difference 1163

Transforming growth factor- β (TGF- β)

uveitis, inflammation, *in situ* hybridization, endotoxin, rabbit 95
rat eye, serine/threonine kinase receptor, immunohistochemistry, TGF- β receptors 335
tears, TGF- β 1, TGF- β 2, tear proteins, human 605
human lacrimal gland, TGF- β 1, TGF- β 2, glandular epithelium 615
uveal melanoma, plasminogen activator, growth factors, urokinase, human 755
alpha-smooth muscle actin, retinal pigment epithelial cells, proliferative vitreoretinopathy, bovine (cattle) 1144

Transmittance

cornea, instrument, transparency, ultraviolet light (UV), visible light, rabbit 411

Transparency

cornea, instrument, transmittance, ultraviolet light (UV), visible light, rabbit 411

Transplantation

retinal pigment epithelium, photoreceptor cell, outer segment regeneration, Royal College of Surgeons rat 1060

Transplantation antigens

corneal endothelial cells, immunochemistry, transmission electron microscopy, ultraviolet light, human 669

Transplantation growth factor- β (TGF- β)

uveitis, inflammation, *in situ* hybridization, endotoxin, rabbit 95

Uveal melanoma

plasminogen activator, transforming growth factor-beta (TGF- β), growth factors, urokinase, human 755

Uveitis

transforming growth factor-beta (TGF- β), inflammation, *in situ* hybridization, endotoxin, rabbit 95
apoptosis, Fas antigen, aqueous humor, memory cell, human 299
aqueous humor, metalloproteinase, TIMP, zymography, human, rabbit 1060

Vascular endothelial growth factor (VEGF)

retinopathy of prematurity, *in situ* hybridization, neovascularization, retinal vasculature, cat 175

Vasoactive substances

K⁺-conductance, pericytes, electrophysiology, cell culture, Royal College of Surgeons (RCS) rat 1045

Visual field

optic disc, morphometry, follow-up, glaucoma, ocular hypertension, human 145

Vitreous

hyaluronic acid, collagen II, ultrastructure, immunohistochemistry, human 37
matrix metalloproteinase, type II collagen, type IX collagen, type V/XI collagen, porcine (pig) 439
hyaluronic acid, collagen II, ultrastructure, immunohistochemistry, human 37
diabetic retinopathy, kallikrein, human kallikrein-binding protein, *in situ* hybridization 1117

Vitreous fluid

Culture contamination, anaerobic culture, endophthalmitis, *Propionibacterium acnes*, human 697

Vitreous liquifaction

hyaluronidase, hyaluronic acid, vitreoretinal pathology, human 1156

Wide-spaced collagen

Descemet's membrane, Fuchs' endothelial dystrophy, iridocorneal-endothelial syndrome, type VIII collagen, human 45

Wound healing

retinal pigment epithelium (RPE), cytoskeletons, intercellular junctions, tissue culture, rat 714
proto-oncogenes, corneal epithelium, *in situ* hybridization, immunohistochemistry, rat 824
injury-related proteins, keratoconus, corneal disease, human 1124

Zinc

rhodopsin phosphorylation, rhodopsin, rhodopsin kinase, rod outer segment, bovine (cattle) 1019

Zygomatic gland

cyclic nucleotide phosphodiesterase, lacrimal gland, Harderian gland, rabbit 1191
